5.	Three units which left the Friedrich Franz Kaserne on 25 August totaled 48 officers and about 1,800 EM who were red-bordered black epaulets, carried carbines and were gas masks. The gas masks were connected with a bag on the left hip by a hose. The units marched to the military post drill field east of Storbeck via Kraenzlin-Wahlendorf-Gross Woltersdorf-Weltersdorfbaum-Waisen-krug. The distance from 1 km east of Kraenzlin as far as Waisenkrug was marched at double time. The spaces between the units grew considerably during the period of the forced march. The units resumed close ranks on the road from Waisenkrug toward Kuhburgberg and continued marching at a normal rate, with the troops wearing their gas masks. (4)
6.	An undetermined number of troops from the Friedrich Franz Kaserne were entrained
	on 1 September and left toward Neustadt. The troops were red-bordered black
X 1	
(1)	Comments. Same source last reported that the See Kaserne was occupied beyond capacity by
X1	about 1,800 troops. The estimate of 2,400 troops given in the present report appears even more unlikely, as reports of the last months
X1	mentioned an average occupation of only 1.000 to 1.200 troops.
X1 (2)	This train was probably one of the two trains which were dispatched from Justerbog
X1 X1	to Neuruppin on 17 August 1951.
(3)	The occupation of the girls' school appears to have remained unchanged since the
K 1	last report by the same source. Courses of instruction and a improperturit of the 12th 3ds Tank Div are believed to be located there.
X1 (4)	was occupied substantially beyond capacity by 2,500 troops, whereas other r
X1 K1	Gas-defense training has also been observed at several control
(5)	training grounds in the Soviet Zone of Germany. The occupation of the Fridericus has an earently not changed since the last
Κ1 Χ1	renort.
X1 (6)
